PHYSICAL

\* optional "Slant range estimation is based on the measured time delay, slant range accuracy depends on sound velocity profile, refraction and signal-to-noise ratio. "See the Configuration Options for available standard interface combinations. "User-configurable Listen Mode is only available with a Wake-Up module installed. Power consumption in Listen Mode depends on Listen Mode settings. "Power consumption for the RS-232 interface option. Add 500 mW for the Ethernet interface option. Add 800 mW for AHRS. Add 300 mW for Wake-Up Module. "Contact Evologics for more information on power supply options. "Dimensions of a Delrin housing, other builds are slightly larger. Marked\* weights are estimates.
